Hip Dysplasia Scheme Breed Specific Statistics 2022

The below table outlines the median hip score for each breed screened under the CHS Hip Dysplasia Scheme. The breed median score is the 'middle' score for all dogs' in that breed (i.e. an equal number of dogs in that breed have scored higher or lower than the median score). Hip scores should be considered along with other criteria as part of responsible breeding programme. It is recommended that breeders choose breeding stock with hips scores around, and ideally below, the 5-year breed median score.

By representing dogs scored in the last 15 years, a more accurate reflection of each breed's current state of health and improvement is given. The 5-year median here refers to dogs scored between 31st October 2017 and 31st October 2022. Hip dysplasia status of the parents, siblings and progeny for Kennel Club registered dogs should also be considered, and these together with a three generation Health Test Pedigree may be downloaded via the Health Test Results Finder, available on the Kennel Club's online health tool Mate Select. In addition, estimated breeding values (EBVs) are available for breeds in which a significant number of breeds have been scored, via the same link.

Breed	Tested 15 years	Tested 5 years	Tested 2022	15 years		5 years
